

...and absolute finesse.

The FURTIVE on-wall concept is the result of our desire to combine elegance and exceptional acoustic performances. With their truly contemporary look and reduced depth, they will blend harmoniously with your interior design.

INNOVATION
CAISSON MURAL

[F U R T I V E]

The "FURTIVE" on-wall speakers are extremely compact, measuring only 10cm deep, and built using high-end quality components. ATOHM loudspeakers are the fruit of several years of research backed up by many hours of listening and tests in our laboratory. They feature an injected aluminum chassis with powerful motorization and "Copper Ring" technology, as well as a specific "LDS" profile suspension... Each component has been designed with the greatest care to guarantee minimum distortion and excellent power handling.

With its unique style and a depth of only 16.5 cm, the "FURTIVE SUB" offers a discreet and elegant alternative to the usual cube shape. Thanks to

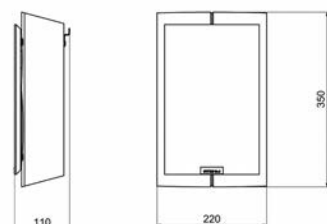

the wall mounting bracket, or detachable stand, it can easily adapt to many different configurations and all types of interior. As with all of our brand products, we adopt a no compromise approach as far as listening performances are concerned. The loudspeaker element is an "Absolute Series" LD230, which is in itself an outstanding example in its category. This impressive device features a powerful motor, weighing 4.7 Kg, and its moving parts provide wide excursion capabilities without distortion, with maximum diaphragm excursions of +/- 18mm !!). To be able to handle such a powerful transducer, the electronics include an ICE POWER high power stage as well as an active filter, providing many different adjustment and connection possibilities. The loudspeaker and its amplifier behave ideally, and in terms of listening performance, the FURTIVE SUB reproduces extremely precise bass frequencies with perfect rapidity and depth. Bearing in mind its quality performances and the endless number of configurations possible, it is a perfect match for the "Furtive" on-wall speakers, combining equally as well as with any small and medium-sized conventional speaker.

Whether you opt for the SUB FURTIVE or the RAFALE V38, the FURTIVE concept can be adapted to a 2.1 Hi-Fi system and a 5.1 home theater system, to reproduce the quintessence of music and movie soundtracks.

[F U R T I V E 1 . 1]

2-way closed box speaker
 Power handling: 70 Weff
 Peak power: 120 W
 Impedance: 6 ohms
 Sensitivity: 88 dB/2.83V/1M
 Frequency response: 80 Hz -30 kHz (-3dB)
 Bass midrange woofer: ATOHM LD130CR04
 Tweeter: ATOHM SD20ND04F
 Weight: 4.0 kg

Base
(Optional)

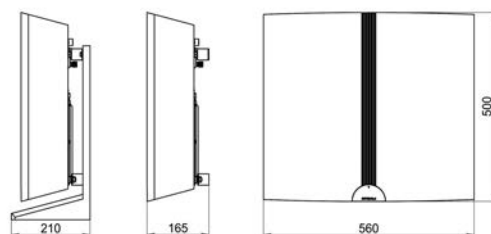

Mural fastener
(Provided)

[F U R T I V E S U B]

Active subwoofer
 Amplifier power: 300 Weff
 Frequency response: 30 Hz -150 Hz (-3dB)
 Crossover slope: 12 /oct 24dB/oct LFE by-pass
 Phase control: 0-180° with a potentiometer
 High and low level inputs
 Double clip limiter
 Woofer: ATOHM LD230CR04
 Manual power up or by signal detection
 Weight : 22Kg
